CONTENTS

Volume 10, Issue Nos. 1–8 (1990)

International Journal for
NUMERICAL METHODS IN FLUIDS

Issue No. 1, January

Fundamental Solutions of the Streamfunction–vorticity Formulation of the Navier–Stokes Equations: H. A. Rodriguez-Prada, F. F. Pironti and A. E. Sáez .. 1

A Finite Element Solution of Unsteady Two-dimensional Flow in Cascades: D. S. Whitehead 13

Nodal Integral Method Solutions for Bénard Natural Convection: G. L. Wilson and R. A. Rydin 35

Galerkin Finite Element Simulation of Convection Driven by Rotation and Gravitation: F. Ladeinde and K. E. Torrance 47

Buoyancy-driven Instability in a Vertical Cylinder: Binary Fluids with Soret Effect. Part I: General Theory and Stationary Stability Results: G. R. Hardin, R. L. Sani, D. Henry and B. Roux 79

CONFERENCE DIARY 119

ANNOUNCEMENT 123

Issue No. 2, January

Iterative Stabilization of the Bilinear Velocity-constant Pressure Element: M. Fortin and S. Boivin 125

Finite Element Solutions of Axisymmetric Euler Equations for an Incompressible and Inviscid Fluid: J.-H. Saiac 141

A Composite Grid Approach for the Euler Equations: M. Reggio, J.-Y. Trepanier and R. Camarero 161

A Design Method for Turbomachinery Blading in Three-dimensional Flow: W. S. Ghaly 179

A Control Volume Finite Difference Method for Buoyant Flow in Three-dimensional Curvilinear Non-orthogonal Co-ordinates: H. Q. Yang, K. T. Yang and J. R. Lloyd 199

Numerical Solution of Plane and Axially Symmetric Jet Flow Problems Based on the Variational Inequality Formulation: H.-Y. Lee and M.-U. Kim 213

CONFERENCE DIARY 223

Indexed or abstracted by 'Applied Mechanics Reviews', 'Boundary Elements Abstracts', 'Cambridge Scientific Abstracts', 'CITIS—Civil Engineering Abstracts', 'Current Contents', 'Engineering Index', 'Eng. Societies Library', 'BHRA Fluid Engineering Centre', 'Geo Abstracts', 'INSPEC', 'Mathematical Reviews', 'Mechanics', 'Newsletter of Eng Analysis Software', 'Shock & Vibration Digest' and 'Zentralblatt für Mathematik'.

Issue No. 3, February

Self-adaptive Hierarchic Finite Element Solution of the One-dimensional Unsaturated Flow Equation: L. M. Abriola and J. R. Lang 227

Quasimolecular Simulation of Large Liquid Drops: D. Greenspan 247

High-order Methods for Differential Equations with Large First-derivative Terms: S. K. Dekema and D. H. Schultz 259

Cascade Aerodynamic Gust Response Including Steady Loading Effects: H.-W. D. Chiang and S. Fleeter 285

Combined Radiation and Natural Convection in a Rectangular Cavity with a Transparent Wall and Containing a Non-participating Fluid: M. Behnia, J. A. Reizes and G. De Vahl Davis 305

A Taylor–Galerkin-based Algorithm for Viscous Incompressible Flow: D. M. Hawken, H. R. Tamaddon-Jahromi, P. Townsend and M. F. Webster 327

CONFERENCE DIARY 353

Issue No. 4, March

Singular Finite Elements for the Sudden-expansion and the Die-swell Problems: G. C. Georgiou, W. W. Schultz and L. G. Olson 357

Comparison of Experimental Data with the Numerical Simulation of Planar Entry Flow: Role of the Constitutive Equation: A. D. Gotsis, D. G. Baird and J. N. Reddy 373

A Simple Physical Approach for Deriving the Characteristic Equations of Fluid Dynamics: B. N. Wang and J. D. Hoffman 401

A Proper Orthogonal Decomposition of a Simulated Supersonic Shear Layer: M. Kirby, J. P. Boris and L. Sirovich 411

An Iterative Implementation of the Uzawa Algorithm for 3-D Fluid Flow Problems: M. P. Robichaud, P. A. Tanguy and M. Fortin 429

On the Reversed Flow and Oscillating Wake in an Asymmetrically Heated Channel: T. S. Chang and T. F. Lin 443

Finite Element Solution of the Navier–Stokes Equations by a Velocity–vorticity Method: G. Guevremont, W. G. Habashi and M. M. Hafez 461

CONFERENCE DIARY 477

Issue No. 5, April

Spectral Simulations of Oscillatory Convection at Low Prandtl Number: J. P. Pulicani, E. Crespo Del Arco, A. Randriamampianina, P. Bontoux and R. Peyret 481

Large Eddy Simulation of a Developing Turbulent Boundary Layer at a Low Reynolds Number: H. M. Tsai and D. C. Leslie 519

Least-squares Finite Element for Compressible Euler Equations: B.-N. Jiang and G. F. Carey 557

Fluid Flow in Curved Ducts: S. Jayanti, G. F. Hewitt and J. R. Kightley 569

An Improved SIP Scheme for Numerical Solutions of Transonic Streamfunction Equations: W. Bao-Guo and C. Nai-Xing 591

CONFERENCE DIARY 603

Issue No. 6, April

REFEREES FOR 1989 iii

A Stable Fast Marching Scheme for Computational Fluid Mechanics: M Behnia, M. Wolfshtein and G. De Vahl Davis 607

A Least-squares Procedure for the Solution of Transport Problems: J. Bensabat and D. G. Zeitoun 623

Simulation of Planar Converging Flow of a Leonov Viscoelastic Fluid: H.-C. Tseng and G.-G. Lin 637

Implicit Finite Element Methods for Two-phase Flow in Oil Reservoirs: H. P. Langtangen 651

A Computational Method for Simulating Transient Motions of an Incompressible Inviscid Fluid with a Free Surface: T. Nakayama 683

A Finite Difference Self-adaptive Mesh Solution of Flow in a Sedimentation Tank: M. Casonato and F. Gallerano 697

Boundary Node Correction and Superconvergence in the FEM: M. Yao and D. S. Malkus 713

CONFERENCE DIARY 723

Issue No. 7, May

Application of a Vortex Lattice Numerical Model in the Calculation of Inviscid Incompressible Flow Around Delta Wings: G. Bandyopadhyay 729

A Scheme for Automatic Generation of Boundary-fitted Depth- and Depth-gradient-dependent Grids in Arbitrary Two-dimensional Regions: P. Nielsen and O. Skovgaard 741

A Moving Finite Element Method for the Population Balance Equation: T. H. Tsang and A. Rao 753

Finite Volume Method for Prediction of Fluid Flow in Arbitrarily Shaped Domains with Moving Boundaries: I. Demirdžić and M. Perić 771

Dynamic Simulation of the Hydrodynamic Interaction Among Immersed Particles in Stokes Flow: M. S. Ingber 791

Boundary Element Calculation of Shallow Water Waves: N. Kaneko, N. Utagawa and M. Kawahara 811

Gobal Pressure Relaxation for Laminar Two-dimensional Internal Flow: D. Rosenbaum and S. G. Rubin 827

CONFERENCE DIARY 849

Issue No. 8, June

Numerical Simulation of Three-Dimensional Transonic Flows: J. Sahu and J. L. Steger 855

An Application of the Vorticity–Vector Potential Method to Laminar Cube Flow: R. Raul, P. S. Bernard and F. T. Buckley, Jr., ... 875

Solution of Viscous Fluid Flows on a Distributed Memory Concurrent Computer: M. E. Braaten 889

Solving Numerically the Navier–Stokes Equations on Parallel Systems: A. Lin 907

Unsymmetric Conjugate Gradient Methods and Sparse Direct Methods in Finite Element Flow Simulation: D. Howard, W. M. Connolley and J. S. Rollett 925

CONFERENCE DIARY 947

ANNOUNCEMENT 952
